

Senior Esri Technical Consultant

Job Advertisement September 2018

Geographic Business Solutions Ltd (GBS) is currently seeking an experienced Senior Esri Technical consultant to join its existing team of GIS professionals who are based in Auckland (Mt Wellington).

GBS (www.gbs.kiwi) is a GIS solutions company that offers a full range of GIS services and solutions to our clients. We are innovative problem solvers with an independent, free thinking approach. We enjoy our work and have fun with it. We are a small to medium sized company that is busy, agile and flexible, with a growing customer base and multi-faceted projects and scale. Staff are often working on more than one project at a time. GBS exclusively works with Esri products and technologies and we are also an Esri Gold Business Partner.

Much of our work is technically challenging and often leading edge due to our customer demands. We create solutions across a range of industry sectors (such as local / central government, agriculture, forestry, utilities and commercial).

GBS allocates time for research and development where possible during working hours and allocates time for professional development as/when required. We try to have fun in our working environment and can offer flexible working hours if required.

The position of Senior Esri Technical Consultant requires someone with **at least 5 years commercial experience** in this role, (please refer to the Position Description at gbs.kiwi for further details). This person will also need experience with Esri's Data Interoperability Extension or FME.

The role will involve the design and development of tailored Esri solutions. In addition, the successful applicant would provide support for existing projects and applications as well as support for individual components of projects – i.e. an integrated team approach. While the role will be primarily a developer's role, there will be non-development projects and general GIS consultancy tasks to be undertaken.

This position requires a recognised tertiary qualification which is directly relevant to Esri software and Web Development. Esri platform experience is highly desirable. Successful applicants will need to have excellent communication skills (written and verbal English).

Applicants will also need to be able to work within our strong project management framework.

Some of the key skills required or that are highly desirable are:

- ArcGIS Enterprise (Portal, Server), ArcGIS Desktop, Esri mobile applications and other Esri applications (e.g. Collector, Survey 123, Operations Dashboard) and including ArcGIS Online
- Frameworks such as Angular, React, Leaflet, Bootstrap and the Esri JS API
- Python, C#/.Net/.Net Core, ASP.Net (MVC), Node, JS
- SQL DB (SQL Server, Oracle, PostGIS, PostGreSQL)
- MS Office
- Project Management Software (Ontime – will be taught if necessary)

GBS is looking for an authentic, enthusiastic and motivated individual who can work equally well independently or as part of a team. You should be creative, have ideas, be able think on your feet, enjoy pressure, and smile! If you like challenges, have high professional standards that are focused towards quality output, have a sense of humour and can work with our clients, then we want to meet with you.

GBS pays very competitive salaries for people who have proven competencies.

GBS will only consider applicants who are currently eligible to work in New Zealand.

Please send your covering letter and CV to:

Geographic Business Solutions Ltd
P.O. Box 272-1387
