

Esri Technical Consultant

ABOUT THE COMPANY

Geographic Business Solutions (GBS) is a leading consultancy in Geographic Information Systems (GIS). We love working with our clients to uncover and make better use of their data and implementing solutions that add real value.

Some recent examples of our work include helping a retailer better manage the delivery of online orders, helping Māori landowners manage and protect their natural resources, assisting local government to manage and share essential information (e.g. planning, biosecurity/biodiversity, property), and having a role in the redevelopment of large areas of urban housing across NZ to try to alleviate the housing crisis.

ABOUT THE ROLE

We are seeking an experienced, and creative, Esri Technical Consultant (ideally with at least 3 years' experience) to join our team of GIS professionals in Auckland. This is a true consulting role where you will be involved with implementing and supporting Esri solutions for a range of diverse customers and industries. You will be involved with Esri platform implementation and configuration, technical advisory, and solution design. This role will require a broad set of skills, both technical and interpersonal. We will help by providing plenty of opportunities to develop your skills in these different areas.

This role will be excellent for your career. You will also be surrounded by a highly skilled and supportive team. You will also gain broad experience, working across different sectors with an opportunity to develop strong networks across local and central government and private industry in New Zealand. We also have growing operations in the Republic of Korea and in the U.S. that you may be involved in supporting.

DUTIES

- Implementing and supporting Esri platform-based systems and solutions for our customers.
- Providing Esri technical advice and support to our customers.
- Working with GBS Business Analysts and Solution Architects to develop solutions for our customers (e.g. assisting with user requirements gathering and interpretation, solution design and cost estimation).
- Contribution to the continuous improvement on the way we work at GBS.
- Contribution to business development initiatives, including preparation of proposals, presentations, and case studies.

SKILLS & EXPERIENCE

- Minimum 3 years' experience in the Esri platform ideally with experience in implementing, managing, and supporting the platform.

- Solid experience in some or all of the following: ArcGIS Enterprise, ArcGIS Online, ArcGIS Desktop (ArcMap and ArcPro), Esri mobile and web application builder technologies, FME, SQL and scripting (Python, Arcade).
- Desire to work in a small innovative company and contribute to its growth and direction.
- Excellent communication skills, both written and verbal.
- Experience in different methods of delivery, from traditional waterfall through to agile and product management.
- Must have NZ Citizenship or clear path to citizenship.

COMPANY CULTURE & BENEFITS

A professional and sociable office environment within an innovation driven company. Flexible working (including options for working from home for some of the week) and a training allowance to upskill are some of the benefits GBS offers their employees.
