Key Dates for end of Web AppBuilder Support

- July 1 2024 – ArcGIS API for JavaScript 3.x and Developer Edition
- 2025 (first half) - WAB as part of ArcGIS Enterprise gone – so 11.4 likely to be the last to support WAB
- Q4 2025 – WAB retired from ArcGIS Online

Start Planning Now

- Review requirements
  - Which apps need to be migrated?
  - Are they fit for purpose, or can this be an opportunity to improve them?
  - Can you replace WAB with EXB out of the box or is custom needed?
  - Should you upgrade your ArcGIS Enterprise?

- Make a plan
  - JS 3.x code (WAB custom widgets) – act now – ideally migrate in the next 12 months.
  - ArcGIS Online/Enterprise WAB – plan and move as soon as you can
  - GBS can help you plan and migrate away from WAB
