

Esri Technical Consultant

ABOUT THE COMPANY

Geographic Business Solutions (GBS) is a leading consultancy in Geographic Information Systems (GIS), based in New Zealand and the United States. GBS is an Esri Gold Partner and currently we are the only Gold Partner in the Asia Pacific Region for Esri Professional Services.

We are a dynamic company that delivers a variety of tailored solutions ranging from strategic advice, Esri ArcGIS platform solutions, business analysis, project management, technical consultancy, and support. Our staff are client facing, problem solving people who always rise to the challenge.

Our clients are diverse in both the private and public sectors across New Zealand, with a growing number in the United States.

ABOUT THE ROLE

We are seeking a junior to intermediate Esri Technical Consultant to join our team of GIS professionals. Ideally you will have a relevant tertiary degree and two to three years' experience, however we will consider someone with less experience if they have the right attitude and a willingness to learn. This is a true consulting role where you will be involved with implementing and supporting Esri solutions for a range of diverse customers and industries. You will be involved with Esri platform implementation and configuration, technical advisory, and client support. This role will ultimately require a broad set of skills, both technical and interpersonal. We will help by providing plenty of opportunities to develop your skills in these different areas.

This role will be excellent for your career. You will also be surrounded by a highly skilled and supportive team. You will also gain broad experience, working across different sectors with an opportunity to develop strong networks across local and central government and the private sector in New Zealand. We also have growing operations in the U.S. that you may be involved in supporting.

DUTIES

- Implementing and supporting Esri platform-based systems and solutions for our customers.
- Providing Esri technical advice and support to our customers.
- Working with GBS Business Analysts and Solution Architects to develop solutions for our customers (e.g. assisting with user requirements gathering and interpretation, solution design and cost estimation).
- Contribution to the continuous improvement on the way we work at GBS.
- Contribution to business development initiatives, including preparation of proposals, presentations, and case studies.

SKILLS & EXPERIENCE OVERVIEW

- Relevant tertiary degree

- Preferably 2 to 3 years' experience in the Esri ArcGIS platform.
- Some experience in some of the following: ArcGIS Enterprise, ArcGIS Online, ArcPro, Esri mobile and web application builder technologies, FME, SQL and scripting (Python, Arcade).
- Desire to work in a small innovative company and contribute to its growth and direction.
- Excellent communication skills, both written and verbal.
- Must be a NZ citizen or resident in NZ with a clear path to citizenship.

COMPANY CULTURE & BENEFITS

A professional and sociable office environment within an innovation driven company. Flexible working (including options for working from home for some of the week), a training allowance to upskill, and medical insurance are some of the benefits GBS offers their employees.
